Dear sir/madam,

I am delighted to be applying for the job as a Computer Programmer/System and web Developer. I am Third Final Year Student from Ardhi University with a Bachelor Degree in Information Systems Management.

Working, taking time to learn and serving customers as a Developer seems like it would be an excellent time to work with brothers and sisters who firmly believe in integrity, compliance, customer focus, team work, eagerness, and ownership that guide, bind and drive them.

Grounded in Information systems management, business with technology, communication skills, and mathematics made me believe that I qualify for this position and I am well positioned to contribute in providing soft and professional outstanding skills, customers experience to customers, and ensure customer satisfaction managing and organizing daily office operations.

Your needs for a person with time management, self-management, and flexible and adaptability skills match my background at Ardhi University where I commuted, every day, back and forth for to university. This experience taught me good lessons on these skills. I am interested to learn more about contributing to your company and I am excited to be in the team of people who are committed in constant learning.

This is a wonderful opportunity to marry my skills and knowledge with the actual works. My mobile number is 0682131140 and my email is nyemamudhihir@gmail.com. Thank you for considering my application and hopefully we will speak soon.

Yours faithfully,

*M.H. Nyema.*
